

OUTWARD BOUND TRIPS

Our pupils are taken out of their comfort zone to help enhance their life skills, whilst educating them with problem solving tasks along with outdoor pursuit's skills. They all stay in well looked after accommodation in rooms of up to eight. This enables them to interact and socialise in an environment out of their norm. During their experience they participate in a wide range of activities from water sports to climbing walls to puzzle solving within a team. Each year our pupils go and come back with a more advanced view on working together and use their new skills to help them in the classroom setting. If the pupils show vast improvement and enhanced skills throughout their stay they could be offered a scholarship for a summer trip, which involves them going away for 19 days and completing an Outward Bound course.
